Training

ML Applications | *Machine Learning, AI applications* **June 2025 - Jul 2025**

Centre for professional enhancement (Lovely Professional University)

- Relevant data is collected from sources like Kaggle and data.gov.in.
- Data preprocessing includes cleaning the data, handling missing values, encoding categories, scaling features, and splitting into train-test sets.
- Some applications include deploying the model using Stream lit, Flask, or cloud platforms.
- The training ends with results interpretation, conclusions, and suggestions for future improvements.
- It starts with clearly defining the problem and understanding its importance.

Projects

Bank Churn Predictor| *Python, Pandas, Scikit-Learn, Seaborn* **June 2025 - Jul 2025**

- The Bank Customer Churn Prediction project was executed over an 8-week training period, with a structured schedule to ensure steady progress.
- Customer churn, where customers cease their engagement with a bank, is a pressing issue for financial institutions like significant revenue loss, as acquiring new customers is estimated to cost five to seven times more than retaining existing ones.
- Perform comprehensive exploration data analysis to identify key predictors of churn, such as age, balance, estimated salary and demographic factors, using visualizations like correlation heatmaps
- Repository Link: **https://github.com/Rishabh2040/Bank-project**

AI Driven Gift Generator | *Python3, HTML, CSS, JavaScript* **Mar 2025 - Apr 2025**

- It typically asks for details like the recipient's age, gender, interests, relationship to the giver (friend, partner, coworker, etc.) the occasion (birthday, anniversary, holiday, etc.). Using this data, the AI analyzes patterns and preferences to recommend thoughtful and relevant gift options.
- It can be implemented as a web application, mobile app, or chatbot using frameworks like Streamlit, Flask, or API-based AI models
- The project may also present additional features such as personalized messages, gift descriptions, or direct shipping links.

Certificates / Certifications

Master Generative AI **Aug 2025**

Coursera - infosys%20certificates/1-4f00be24-fa35-46c3-a380-db358cf0e38d.pdf

Computational Theory **Sept 2025**

Coursera - infosys%20certificates/1-445c5687-dde2-4563-9638-bd0456f4dc3a.pdf

Hackathon **Mar 2021**

Boord Infinity - https://boord-infinity.com/certificate/202025-11-23%20213516.png

Skills

Languages C++, Java, JavaScript

Technologies/Frameworks: Git, GitHub, Ubuntu

Domain Skills: Data Structures and Algorithms, Responsive Web Design, Scripting in Python and JavaScript

Education

Lovely Professional University **2023 -Present**

Bachelor of Technology - Computer Science and Engineering — CGPA: 6.73 *Phagwara, Punjab*

DAV Public School **2021**

12th — Percentage: 75.60% *Kurukshetra, Haryana*

DAV Public School **2019**

10th — Percentage: 89.80% *Kurukshetra, Haryana*
